(FOR IMMEDIATE RELEASE)

ISF GROUP BERHAD WINS RM22.48 MILLION IN RESIDENTIAL AND DATA CENTRE CONTRACTS

~ Lifting order book to RM148.10 million ~

Kuala Lumpur, 13 April 2026 – End-to-end piping solutions provider, ISF Group Berhad (“ISF” or the “Company”) (“杨成群集团”) (stock code: 0390), via its wholly-owned subsidiary, Yeo Plumber Sdn Bhd (“YPSB”), has secured four (4) new contracts with a combined value of RM22.48 million.

The contracts, primarily from residential and data centre projects, are expected to contribute to the Group’s earnings up to the financial year ending 31 December 2028.

The scope of works involves the supply, delivery, installation, testing, commissioning and maintenance of Cold Water and Sanitary Plumbing Services. The contract wins reflect the Group’s established track record and technical capabilities across both residential developments and data centre facilities.

Following these contract awards, ISF’s unbilled order book has increased to RM148.10 million. The rising contribution from data centre-related projects highlights the Group’s ability to secure technically demanding assignments.

Mr. Jeff Ai Boon Chen (杨汶潜先生), Managing Director of ISF, said, “These contract wins reinforce our position in segments with sustained demand. While our progress in data centre projects is encouraging, given the higher technical requirements and execution standards involved, we continue to secure projects across a diversified client base, including residential and industrial developments.”

He added, “As Malaysia’s digital infrastructure continues to expand, we are seeing a strong pipeline of opportunities. While we remain mindful of macroeconomic uncertainties, we will continue to adopt a prudent approach to project selection and cost management. This will allow us to sustain profit margins while building a resilient order book.”

Following its successful listing on the ACE Market on 28 January 2026, ISF remains focused on capturing opportunities arising from the expansion of data centres in Johor and the Klang Valley. At the same time, the Group continues to support Malaysia’s urbanisation through its established relationships with residential developers. With operations across seven states, ISF is well positioned to scale alongside Malaysia’s infrastructure and digital growth.

About ISF Group Berhad

Based in Johor, ISF Group Berhad, via its subsidiary (collectively, known as the “**Group**”) is principally involved in the supply and installation of piping systems for end-user premises as well as water supply and sewer infrastructure piping. The Group also provides maintenance and repair services for piping systems.

Through its indirect distribution channel, the Group serves, among others, main contractors, project management companies, and mechanical and engineering contractors, while its direct distribution channel serves business owners, property owners, and property developers. Its projects cover industrial, data centre, residential, commercial, institutional, healthcare, and infrastructure such as power plants and mass transit facilities sectors, supporting a strong market presence and nationwide footprint across Peninsular Malaysia.
